SUBJECT INDEX

Aluminium
production and characterization of the anodic film on Al–6%Zn–1%Mg alloy, 231
electrodeposition of aluminium from aromatic solvents, 549
influence of excimer laser treatment on an aluminium alloy surface, 365
estimating the barrier layer thickness of porous aluminium oxide films with a.c. impedance measurements, 311
NiCrAl/bentonite thermal spray powder for high temperature abradable seals, 69
Anodic film
production and characterization of the anodic film on Al–6%Zn–1%Mg alloy, 231
Auger electron spectroscopy
Auger electron spectroscopy and electrochemical characterization of Au–Pd system in 1 M H_2SO_4, 141
surface segragation in $Cu_{70}Zr_{30}$ metglass: an Auger electron spectroscopy study, 133

Barrier layer
estimating the barrier layer thickness of porous aluminium oxide films with a.c. impedance measurements, 311
Bentonite
NiCrAl/bentonite thermal spray powder for high temperature abradable seals, 69
Bromates
formation of bromates at an RuO_2/TiO_2 titanium anode, 177

Cadmium
dendritic electrocrystallization of cadium from the acid sulphate solution I: Granular cadium substrate, 219
Cavitation erosion
study of the cavitation erosion behaviour of a Ti–N alloy coating, 79
Ceramic coatings
surface treatment of plasma-sprayed ceramic coatings by a laser beam, 59
Chromate
black chromate conversion coatings on electrodeposited zinc, 501
Chromium
NiCrAl/bentonite thermal spray powder for high temperature abradable seals, 69
Coatings
inclusion pattern of non-conductive particles in electrodeposited nickel coatings, 493
Cobalt
diffusion-elastic phenomena in nickel and cobalt electrodeposits plated on to strip cathodes, 441
oxygen evolution reaction on cobalt-containing β-MnO_2, 287
Copper
electrode surface coarsening in pulsating overpotential copper electrodeposition, 355
influence of anions on the passivity behaviour of copper in alkaline solutions, 383
magnetic field effects on the electrodeposition of copper from copper sulphate in sulphuric acid, 455
pulse plating of Ni–Cu alloys, 243
surface segragation in $Cu_{70}Zr_{30}$ metglass: an Auger electron spectroscopy study, 133
Copper impedance
studies of copper impedance in alkaline aqueous solutions in the presence of inorganic anions, 401
Corrosion
corrosion inhibition of mild steel in sodium gluconate–borate solutions, 537
corrosion of tin in nitric acid solutions, 463
influence of brushing and abrasion on the *in vitro* corrosion resistance of dental amalgams, 523

© Elsevier Sequoia/Printed in The Netherlands

influence of some anions on the stress corrosion of low alloy steels in aqueous solutions, 561
Corrosion behaviour
effect of silicon addition on the microstructure and corrosion behaviour of sintered stainless steel, 207

Dental amalgams
influence of brushing and abrasion on the *in vitro* corrosion resistance of dental amalgams, 523
Diffusion
diffusion measurements of tin coatings on iron, 149
Diffusion behaviour
interferometric investigations of the diffusion behaviour of metal ions during levelling. Part II, 483
Diffusion-elastic phenomena
diffusion-elastic phenomena in nickel and cobalt electrodeposits plated on to strip cathodes, 441

Electrodeposition
electrode surface coarsening in pulsating overpotential copper electrodeposition, 355
magnetic field effects on the electrodeposition of copper from copper sulphate in sulphuric acid, 455
the electrodeposition of aluminium from aromatic solvents, 549
the role of ion bridging in controlling competitive electrode position processes, 515

Ferric oxide
photo-anodic behaviour of α-ferric oxide film electrodes coated with various metal oxides, 345

Germanium
saturation of the surface of steels with silicon and germanium from salt melts, 277
Gold
Auger electron spectroscopy and electrochemical characterization of Au–Pd system in 1 M H_2SO_4, 141
electrochemical asesessment of the tarnish resistance of decorative gold alloys, 253
Grit blasting
Technical Note: Grid blasting as surface preparation before plasma spraying, 101

Hydrodynamics
the role played by hydrodynamics in the levelling process during bright copper plating from acidic electrolytes. Part I., 471

Interferometric investigations
interferometric investigations of the diffusion behaviour of metal ions during levelling. Part II, 483
Ion bridging
the role of ion bridging in controlling competitive electrode position processes, 515
Ion implantation
practical application of ion implantation for modifying tribological properties of metals, 185
Iron
diffusion measurements of tin coatings on iron, 149
Iron sulphide
pyrophoric oxidation of iron sulphide, 163

Laser
influence of heating rate on the laser surface hardening of a medium carbon steel, 319
surface treatment of plasma-sprayed ceramic coatings by a laser beam, 59
influence of excimer laser treatment on an aluminium alloy surface, 365
Levelling
interferometric investigations of the diffusion behaviour of metal ions during levelling. Part II, 483
the role played by hydrodynamics in the levelling process during bright copper plating from acidic electrolytes. Part I, 471

Magnesium
production and characterization of the anodic film on Al–6%Zr–1%Mg alloy, 231
Magnetic field effects
magnetic field effects on the electrodeposition of copper from copper sulphate in sulphuric acid, 455

Manganese
oxygen evolution reaction on cobalt-containing β-MnO_2, 287
Metglass
surface segragation in $Cu_{70}Zr_{30}$ metglass: an Auger electron spectroscopy study, 133
Microstructure
effect of silicon addition on the microstructure and corrosion behaviour of sintered stainless steel, 207

Nickel
diffusion-elastic phenomena in nickel and cobalt electrodeposits plated on to strip cathodes, 441
inclusion pattern of non-conductive particles in electrodeposited nickel coatings, 493
in situ activation of a nickel cathode by sodium molybdate, 373
NiCrAl/bentonite thermal spray powder for high temperature abradable seals, 69
pulse plating of Ni–Cu alloys, 243
Nitrogen
physical vapor-deposited TiN on cemented carbide: tempering effects, 123
study of the cavitation erosion behaviour of a Ti–N alloy coating, 79

Oxide layer
improvement of oxide layer stability by use of chemical surface attack, 295

Palladium
Auger electron spectroscopy and electrochemical characterization of Au–Pd system in 1 M H_2SO_4, 141
Passivity behaviour
influence of anions on the passivity behaviour of copper in alkaline solutions, 383
Photo-anodic behaviour
photo-anodic behaviour of α-ferric oxide film electrodes coated with various metal oxides, 345
Physical vapor-deposition
physical vapor-deposited TiN on cemented carbide: tempering effects, 123
Plasma spraying
effect of chamber pressure on particle velocities in low pressure plasma-spray deposition, 25
fracture toughness of plasma-sprayed zirconia coatings, 15
fundamental studies associated with the plasma spray process, 1
residual stresses in ZrO_2–8%Y_2O_3 plasma-sprayed thermal barrier coatings, 33
Plating
the role played by hydrodynamics in the levelling process during bright copper plating from acidic electrolytes. Part I, 471
Powder mass flow
Technical Note: Automated powder mass flow monitoring and control system, 89
Pulse plating
pulse plating of Ni–Cu alloys, 243
Pyrophoric oxidation
pyrophoric oxidation of iron sulphide, 163

Quartz plates
vectorial analysis for the numerical simulation of the surface profiles of etched singly-rotated quartz plates, 417

Ruthenium
formation of bromates at an RuO_2/TiO_2 titanium anode, 177

Silicon
saturation of the surface of steels with silicon and germanium from salt melts, 277
Silicon addition
effect of silicon addition on the microstructure and corrosion behaviour of sintered stainless steel, 207
Sodium molybdate
in situ activation of a nickel cathode by sodium molybdate, 373
Steel
corrosion inhibition of mild steel in sodium gluconate–borate solutions, 537
effect of silicon addition on the microstructure and corrosion behaviour of sintered stainless steel, 207
influence of heating rate on the laser surface hardening of a medium carbon steel, 319

influence of some anions on the stress corrosion of low alloy steels in aqueous solutions, 561
saturation of the surface of steels with silicon and germanium from salt melts, 277
Surface profiles
vectorial analysis for the numerical simulation of the surface profiles of etched singly-rotated quartz plates, 417

Tarnish resistance
electrochemical assessment of the tarnish resistance of decorative gold alloys, 253
Thermal barrier
residual stresses in ZrO_2–8%Y_2O_3 plasma-sprayed thermal barrier coatings, 33
Thermal spraying
NiCrAl/betonite thermal spray powder for high temperature abradable seals, 69
Thermal-wave-testing
the influence of coating properties on the sensitivity of thermal-wave-testing techniques, 51
Tin
corrosion of tin in nitric acid solutions, 463
diffusion measurements of tin coatings on iron, 149
Titanium
formation of bromates at an RuO_2/TiO_2 titanium anode, 177
physical vapor-deposited TiN on cemented carbide: tempering effects, 123
study of the cavitation erosion behaviour of a Ti–N alloy coating, 79
Tribological properties
practical application of ion implantation for modifying tribological properties of metals, 185

Vectorial analysis
vectorial analysis for the numerical simulation of the surface profiles of etched singly-rotated quartz plates, 417

X-ray photoelectron spectroscopy
study of the behaviour of protective metal surfaces in the presence of gas by X-ray photoelectron spectroscopy, 155

Yttrium
residual stresses in ZrO_2–8%Y_2O_3 plasma-sprayed thermal barrier coatings, 33

Zinc
black chromate conversion coatings on electrodeposited zinc, 501
production and characterization of the anodic film on Al–6%Zn–1%Mg alloy, 231
Zinc phosphate
relationship between the formation of zinc phosphate crystals and their electrochemical properties, 331
Zirconium
fracture toughness of plasma-sprayed zirconia coatings, 15
residual stresses in ZrO_2–8%Y_2O_3 plasma-sprayed thermal barrier coatings, 33
surface segragation in $Cu_{70}Zr_{30}$ metglass: an Auger electron spectroscopy study, 133
